

## Veotec Three Stage Spray Eliminator (SE3)

SE3 air intake separators are designed to be used in demanding installations such as those found in all Offshore, Coastal, Marine and Navy Ship environments.

## Three Stage Spray Eliminator & Blast Protection

SE3 is a three stage filter system generally comprising inertial vane separator (SE1), filter coalescer, and a second inertial vane separator.

The SE3 tends to be used where a very high efficiency of water and salt removal is required. Also used where a high velocity is required with high efficiency protection.

### Features & Benefits

- Compact size and lightweight
- Robust construction
- Removes almost all water droplets (see reverse for technical data)
- Excellent bulk water removal through its operating range
- Available in sizes to suit customer needs and industry standards
- Constructed in marine grade aluminium or high grade stainless steels
- Easily maintained
- Various water drainage options
- Available with ancillary equipment
- IPx6 Certified for water removal

### Materials of Construction

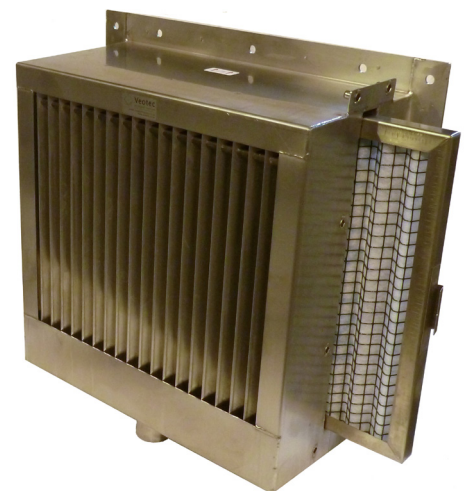

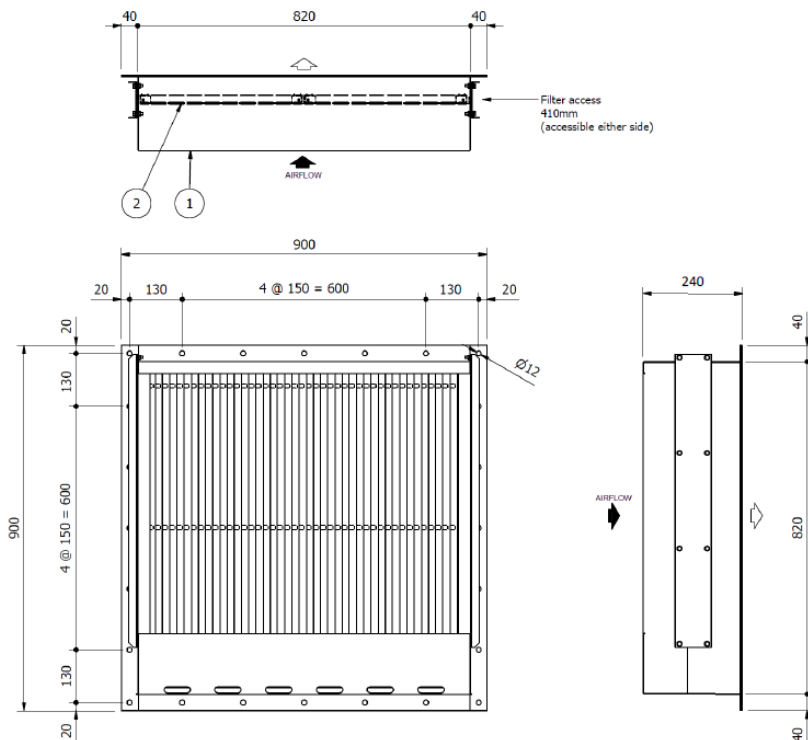

#### Configuration:

The SE3 is available in one configuration

Used as: inertial vane separator (SE1) / filter coalescer / inertial vane separator

Veotec offers various filter coalescer options and can define the optimum SE3 system for your installations

### Dimension Drawings

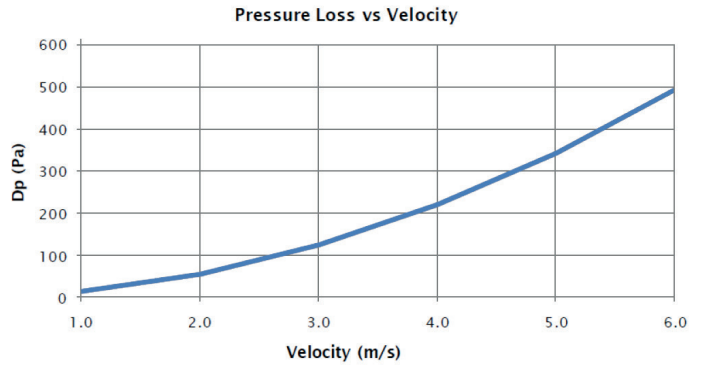

## Installation

Typical installation arrangements are:

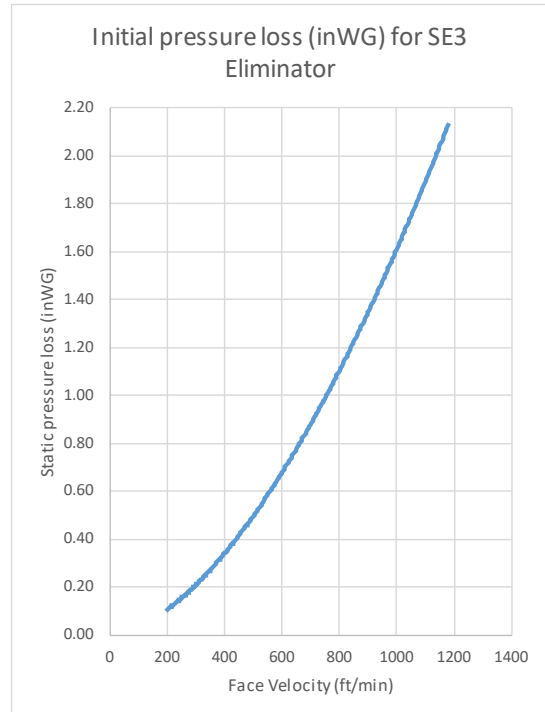

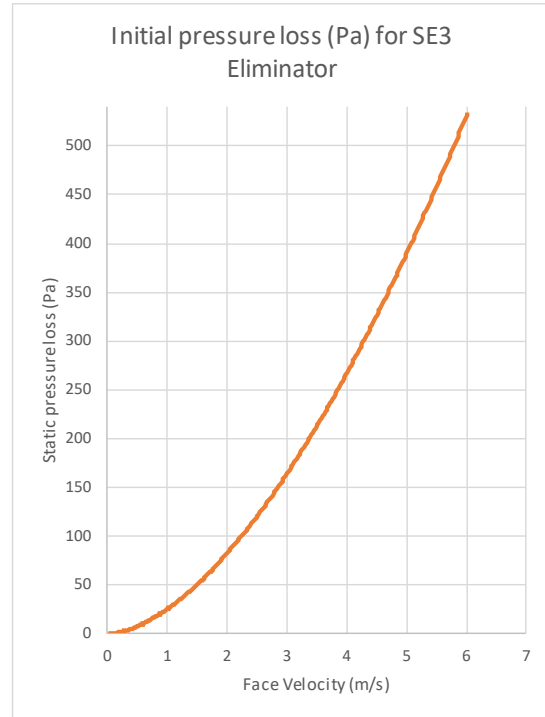

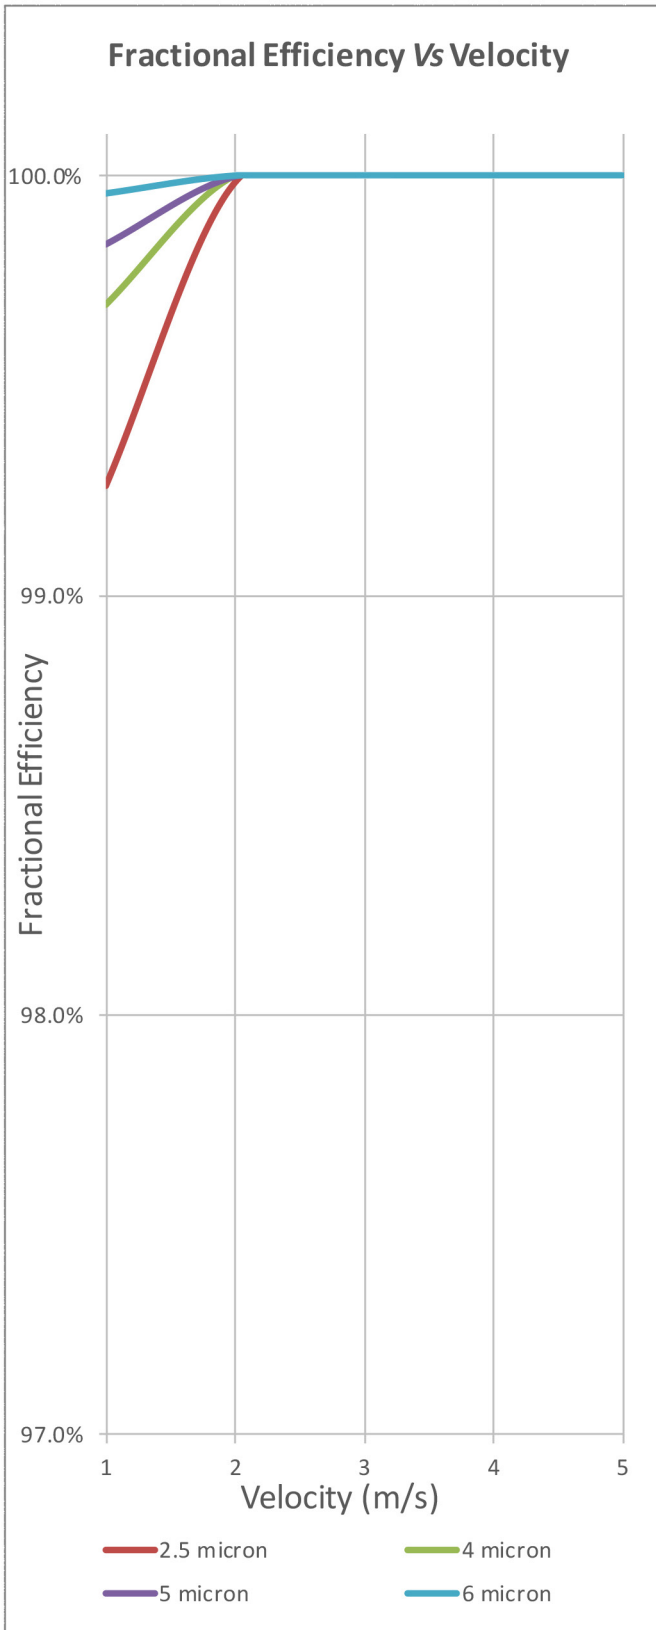

- Mounting in duct
- Double flanged
- Trace heated, available with

## Performance

## Performance & Efficiency

Wozair's performance and efficiency data has been independently verified by an independent testing laboratory and is proven to meet the highest of industry standards.
